

## Job Description

**Title:** Oracle RDBMS Expert

**Location:** Pune, India

### Overview

appOrbit is an emerging start up enabling customers accelerate the digital transformation of their businesses. Our vision is to make it possible for enterprises to deploy and manage end to end life cycle of any application (legacy, cloud native, windows, linux) on any infrastructure (virtual machines, containers, bare-metal) across any cloud (public, private, hybrid). Our platform is already helping several dozen customers realize this vision.

We are looking for an Oracle RDBMS expert who will be the go-to Oracle engineer for everything in Oracle. This person will be the in-house Oracle database expert with DBA and development experience.

### Responsibilities:

- Design the architecture for Apporbit to interface with Oracle
- Design test cases for Oracle setup
- Automate test cases for Oracle setup
- Setup, maintain, and administer test Oracle setups

### Qualifications:

- Bachelor's degree or higher in Computer Science or related field
- 5 years of experience with Oracle database administration with versions 10g , 11g and 12c
- Expert in Real Applications Clusters (RAC), Data Guard, Flashback technology, Recover Manager, and Oracle Enterprise Manager, and related utilities and tools.
- Experience in performing oracle backup and replication to standby databases
- Knowledge of Linux operating systems
- Knowledge of python

### Preferred Skills:

- QA automation experience
- Oracle tuning experience

### Benefits:

- Fun, creative and fast-paced working environment
- Terrific medical and accident insurance plans
- Pantry stocked with snacks and beverages
- Flexible time-off with generous paid holidays
